NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request; Grantee Reporting Requirements for National User Facilities managed by the NSF Division of Materials Research

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the *second notice* for public comment; the first was published in the *Federal Register*, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review – Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay

Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Copies of the submission may be obtained by calling 703-292-7556.

SUPPLEMENTARY INFORMATION: NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Title of Collection: Evaluation of the Sustainability and Diffusion of the NSF ADVANCE Program.

OMB Number: 3145-0234.

Type of Request: Revision to and extension of approval of an information collection.

Proposed Project:

The NSF Division of Materials Research (DMR) supports a number of National User Facilities that provide specialized capabilities and instrumentation to the scientific community on a competitive proposal basis. In addition to the user program, these facilities support in-house research, development of new instrumentation or techniques, education, and knowledge transfer.

The facilities integrate research and education for students and post-docs involved in experiments, and support extensive K-12 outreach to foster an interest in Science Technology Engineering and Mathematics (STEM) and STEM careers. Facilities capitalize on diversity through participation in center activities and

demonstrate leadership in the involvement of groups underrepresented in science and engineering.

National User Facilities will be required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. User facilities will be required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting (RPPR) module in Research.gov. These indicators are both quantitative and descriptive and may include, for example, lists of successful proposal and users, the characteristics of facility personnel and students; sources of financial support and in-kind support; expenditures by operational component; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students supported through the facility or users of the facility; descriptions of significant advances and other outcomes of this investment. Such reporting requirements are included in the cooperative agreement which is binding between the academic institution and the NSF.

Each facility's annual report will address the following categories of activities: (1) research, (2) education and training, (3) knowledge transfer, (4) partnerships, (5) diversity, (6) management, and (7) budget issues.

For each of the categories the report will describe overall objectives and metrics for the reporting period, challenges or problems the facility has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

Facilities are required to file a final report through the RPPR. Final reports contain similar information and metrics as annual reports, but are retrospective and focus on the period that was not addressed in previous annual reports.

Use of the Information: NSF will use the information to continue funding of the DMR National User Facilities, and to evaluate the progress of the program.

Estimate of Burden: 790 hours per facility for three National User Facilities for a total of 2,370 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One (1) from each of the DMR user facilities.

COMMENTS: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: June 18, 2020.

Suzanne H. Plimpton,

Reports Clearance Officer,

National Science Foundation.
